Greetings

International Round Table (IRT) on Nucleosides, Nucleotides and Nucleic Acids is organized by IS3NA and the most prestigious conference which focuses on oligonucleotides, nucleic acids, and their components. The conferences have been held every two years since 1974, and the 25th IRT (IRT2024) will be taken place at Katsushika Campus of Tokyo University of Science in Tokyo, Japan. In the meeting, the researchers in the field of chemistry, biology, and medicine of oligonucleotides and nucleic acids will gather and discuss about the cutting-edge science. The world's leading researchers will be invited and make presentations about their valuable achievement. The meeting will provide the constructive opportunity to share the discoveries and knowledge relating to oligonucleotides and nucleic acids.

Although the conference expense will be partly covered by registration fees from participants, we kindly ask for additional supports from the colleagues in Industry. Your generous donations will allow us to cover the travel expenses for illustrious invited speakers, travel grants for promising students and postdocs. We hope that your organization would consider becoming a sponsor for IRT2024.

Please contact us if you are interested in becoming a sponsor.
